

Registered Programme Packages

In accordance with the Rulebook on the Content and Format of the Application Form for Enrollment in the Register of Operators Retransmitting Programme Packages and the Programme Package/Service Registration Certificate, No. 01-5775/1, adopted on 21 November 2014, the operators of public electronic communication networks are obliged to submit, along with the other documentation, a “License for Television or Radio Broadcasting of the foreign broadcaster from which the programme service to be retransmitted originates, issued by the competent regulator in the country of origin”.

In order to simplify the process of registration of the foreign programme services as part of the programme packages of the operators of public electronic communication networks, the Agency prepared an overview of permits (licenses) issued to the foreign broadcasters, which it has at its disposal.
