

Print Media

There are 22 entities currently registered within the Register of Print Media Publishers.

The Agency's competences regarding print media are restricted to supervision over the following obligations: ensuring minors' protection (in case the print media outlet includes adult content, its copies should have a visible warning and be packed in sealed transparent plastic bags); nomination of an editor-in-chief; publishing of an Impressum and printing data about their ownership structure.

After the Agency conducts supervision, it prepares a report. If it establishes any violation, the Agency imposes a warning measure against the publisher of the print media outlet, and, if the latter continues committing the same violation of the law throughout the year, initiates a misdemeanour procedure before the competent court.
