

Request Form for obtaining a television broadcasting license

The Request Form for obtaining a television broadcasting license without announcing a public competition can be downloaded here

How to define the structure of the programme/music in the applications?

In order to more easily define the structure of the planned programme, i.e. the structure of the planned music, in the applications, the Agency has prepared Excel tables which automatically calculate the duration of the programme/music, the duration of the programme by functions and the presence by functions.

The particular Excel tables can be downloaded at the following links:

Programme concept for the television programme service
